

Price List Introduction

Parts For Astons Ltd are the largest independent manufacturer of parts for the early 1960's Astons Martins, specialising in engine, transmission, cooling, carburetion & fuel, brakes, suspension and steering components for the DB4, DB4GT, DB5 & DB6 marques.

We specialise in manufacturing components that are no longer available or that are extremely difficult to obtain.

After working in the car restoration business for over thirty years we appreciate how difficult it can be to pass on part costs to the customer. As a result we have sourced UK manufactures that not only produce exceptional components but can also supply the component at a competitive and realistic price, allowing us to pass on savings to our customers. Because of this and our dedication to fast lead times we are gaining a reputation for being the supplier of Aston parts in the UK and overseas, adding to our client list month on month

Since the last trade price list we have made a major investment in the tooling for the suspension components for all models including many special components unique to the DB4GT & Zagato.

Your Parts For Astons Team

Abbreviations used in the price list.

POA	Price on Application
NLA	No Longer Available from Aston Martin
NA	Never Available from Aston Martin
IM	In the process of being manufactured By Parts For Astons

Part Number Changes

Over years Aston Martin changed some part numbers as new model cars were released, although the parts were the same as earlier models. Where this is the case we have included both part numbers, where the new part number is blank the original part number is still applicable, please refer to your cars parts catalogue for the part number you require.
